

First to Start. Last to Quit.

FOR IMMEDIATE RELEASE

Shindaiwa Introduces Two New and Powerful Handheld blowers: the EB2510 and EB3410

Tualatin, Oregon (January 5, 2007) – The EB2510 and EB3410 blowers are the latest innovations from Shindaiwa. Featuring Shindaiwa's patented C4 Technology® engine, these commercial-grade handheld blowers provide remarkable performance with low engine noise, low emissions, and excellent fuel economy.

The low tone of the EB2510 is deceptively quiet for a high-performance, commercial engine. The 1.1 horsepower EB2510 has incredible performance for such a small package; output at the housing is an amazing 420 cubic feet per minute (CFM) with a nozzle velocity of 191 MPH! In its class, the 1.4 horsepower Shindaiwa EB3410 is the most powerful blower available in the market today. Registering 505 CFM at the housing and 199 MPH at the tube tip, the slightly larger, more robust EB3410 will tackle the toughest jobs.

Both models feature an easy access air filter, a multi-function, rubber coated operating handle incorporating an anti-vibration system to reduce vibration felt by the operator, a convenient rapid fire, pistol grip throttle handle with cruise control function for sustained “hands-off” operation, and a special “hush” mode switch to reduce noise levels in noise sensitive areas. For greater durability and performance, the EB2510 and EB3410 are equipped with a chrome-plated cylinder and a two-ring piston.

According to Mike Nichols, Shindaiwa Vice President of Marketing and Business Development, “The new handheld blowers from Shindaiwa employ many professional features and are designed especially for the commercial landscaper. From truck to task, these fast and flexible, handheld blowers are often quicker than a backpack blower; A great choice for smaller jobs not requiring a backpack blower.”

A world leader in producing commercial-grade outdoor power equipment and environmentally-friendly small engine technologies, Shindaiwa products are distributed exclusively through clean two-step distribution and independent servicing dealers.
