

Shindaiwa Introduces “Son of Speed-Feed®”

Tualatin, Oregon (April 3, 2007) - Introduced in the spring of 2005 the original Shindaiwa Speed-Feed® trimmer head (SFH 450) has already proved to be a remarkable success. And now, Shindaiwa is pleased to announce the availability of the new Speed-Feed®375 (SFH 375).

Featuring many of the same benefits and interchangeable parts of the original Speed-Feed® trimmer head - loading line without dismantling in 30 seconds or less - the Speed-Feed®375 is smaller in diameter, 30% lighter and provides a perfect fit up with 25cc or smaller displacement engines. The new Speed-Feed® also has adapter hardware so the head can fit most major competitive models.

According to Greg Imus, Shindaiwa Vice President of Sales, Marketing & Technical Services, “In its first year of production, the Speed-Feed® head has already out-sold all other Shindaiwa trimmer heads combined. Plus, it is quickly taking over a strong market position as the head of choice – not only for Shindaiwa customers, but also for users of many competitive brand brushcutters.”

Other Speed-Feed®375 Features:

- Line diameter range: .065” to .105” any shape
- Holds 10 feet of .080” line and 8.2’ of .095” line
- Durable glass filled nylon material
- Large, durable eyelets enhance trimmer line life
- Eyelets are replaceable and interchangeable between the SFH 375 & SFH 450.
- All hardware (arbor, bushing, and studs) are interchangeable between the SFH 375 and SFH 450.
- Flat bottom allows the head to glide while trimming
- No dismantling required to re-load trimmer line, loads in 30 seconds or less!
- Inner wall keeps debris out of the head
- Line tensioning system with split spool reduces head vibration

A world leader in producing commercial-grade outdoor power equipment and environmentally-friendly small engine technologies, Shindaiwa products are distributed exclusively through clean two-step distribution and independent servicing dealers.
